About Us

Founded in 1990, XSi helps Global ITAD Providers and Latin American companies with any IT Asset Disposition requirements in most LATAM countries. Whether or not your organization has established the necessary infrastructure and/or relationships in LATAM, it is likely that XSi can be of assistance. In addition to having dedicated staff that are able to speak native languages, XSi has built an infrastructure and hundreds of relationships throughout LATAM to apply solutions to almost anything you might need handled.

Service Features

- 30 years of industry experience in IT Asset Disposition

- Trusted provider to most of Gartner's recognized global ITAD providers

- Secure chain of custody processing and handling

- Support or leadership for FMV valuations

- Onsite wiping to NIST 800-88 specification, de-installs, onsite audits, secure transport

- Offsite disk destruction, certificate documentation for wiping and/or destruction

- Remarketing support, responsible recycling with responsible disposition

XSi Credibility

Certifications

XSi supports the most discerning and security-sensitive IT departments in the world, which includes: the US federal government, healthcare, financial services & banking entities, etc.

- XSi is ISO9001:2015 Certified for Product Resale

- Meets SAE AS5553 Standards (Counterfeit Electronic Parts Compliant)

- NIST SP 800-171 Compliant

- Member of GIDEP

- NIST 800-88 Wiping Standard

- Federal Prime Contractor since 1992

- Trusted supplier to DOD (Audited by U.S. Navy) and all of the Top 10 Federal Systems Integrators

- XSi's global hardware maintenance service provides more technical expertise than our competition

IT Asset Disposition Process

1 Pick Up
Schedule inventory pick-up or in-house ITAD services. Inventory count, verification, serial number scan, packing and secure transportation.

2 Asset Audit
Complete inventory audit: OEM, model, serial number, processor, HDD, RAM, testing and grading each asset.

3 Data Wipe
Perform secure data erasure and generate erasure certificates for each drive. If data wipe fails, or client prefers HDD destruction, XSi offers drill, crush, shred or degauss services.

4 Establish Asset Potential
XSi will always strive to find market value to minimize e-waste. If no market value is possible, XSi send the products to recycling and produces e-recycling certificate.

5 Refurbish & Value Recovery
XSi refurbishes the asset, including OS re-installation and any needed hardware repairs.

6 Remarketing
XSi remarkets the assets of value to establish the highest possible value.

7 Final Reporting
XSi provides final inventory and asset reports, certificates of digital erasure or HDD destruction and/or return on investment for the remarketed assets or certificate of destruction for the assets.

Onsite & Offsite Services Available

- Equipment deinstallation (installation of replacement products)

- Onsite data erasure and disk destruction

- Inventory verification

- Packing and removal of retired assets

- Equipment testing, grading, and refurbishment

- Equipment resale

- Certified recycling for non-resellable equipment
